ADULT DIAPERS

An adult disposable diaper consists of an absorbent pad sandwiched between two sheets of non-woven fabric. The top non-woven sheet is a comfortable shape and helps prevent leakage, and the pad is specially designed to absorb and retain body fluid. Adult disposable diaper is made through a multi-step process in which the absorbent pad is first vacuum-formed, then attached to a permeable top sheet and impermeable bottom sheet. Elastic fibres are attached to the sheets to gather the edges of the diaper into the proper shape so it fits snugly around legs and crotch. When properly fitted, the adult disposable diaper will retain body fluids, which pass through the permeable top sheet and are absorbed into the pad.

Our adult cotton diaper has many excellences. It has a soft breathable cover with a high speed channel allowing fresh air to circulate through the cover and making your skin dry. In addition, our adult cotton diaper with odour controls helps to reduce unpleasant odour. It can also inhibit the growth of bacteria to help reduce skin irritation remarkably. Therefore, please be reassured to use these products: adult cotton diaper, adult incontinence pants, adult diaper cover, teen diaper, adult disposable diaper, adult incontinence products, adult nappy, adult incontinence diaper, adult diaper pants and etc.

OTHER PRODUCTS

ADULT UNDERPAD

Nowadays, adult under pad is widely used in the world. They are all absorbent pads. The most important property of a diaper or under pad is its ability to absorb and retain moisture. Cotton material used in adult under pad is reasonably absorbent, but synthetic polymers far exceed the capacity of natural fibres. Its absorption capacity is due to the absorbent pad found in the core of the breathable under pad. This under pad has high quality non-woven fabric as top layer to make sure clean and dry feeling. The absorbing layer of adult under pad is composed of fuzz pulp coated by toilet paper and high polymer absorbing resin which can absorb liquid 200 times larger than its volume. Then, the bottom of air flow under pad is high quality flow casting film, never leak. They are with good materials capable of absorbing liquid for many times, so as to provide a closer fit for better protection. Our products: adult under pad, adult nursing pad, disposable underwear's, breathable under pad, disposable under pad, air flow under pad, disposable nursing pads, absorbent under pad, sanitary under pad, incontinence products and so on are all passed test and awarded certification.

DISPOSABLE ADULT UNDERPAD

Disposable adult under pad is a kind of economic substitution for adult diapers. The first layer of it is classic non woven surface which is soft and breathable to keep fresh and natural. And the second layer is composed of gulf pulp, cotton tissue and so on. However, despite incontinence pads manufacture is a high technology field which has consistently shown innovation over the last few decades, but there are still a number of areas which require additional improvement. One such area is leakage reduction. Our disposable adult under pad holding inner leak guard keeps the clothes around body dry and soft. We have developed improved elastic bands to hold the waist more tightly without discomfort. And the back sheet of incontinence pads with water-proof barriers can guarantee hygiene and clean. With the development of technology, pads will be less bulk and more biodegradable. Our products- incontinence pads, adult incontinence, incontinent pad, incontinence diaper, disposable adult under pad, bedwetting pads, diaper doublers, adult paper pads, bladder control and incontinent mat are more features available.
